# COW-WELFARE FLEX STALL

## FLEXIBLE CUBICLES

DESIGNED TO PROMOTE COW PERFORMANCE AND LONGEVITY  
AND OPTIMISE ANIMAL WELFARE

### HOW COW-WELFARE FLEX STALL WORKS

The cubicle is designed to provide optimal conditions for the cow. A post for each cow means that the stall itself is very open at the front, providing optimal conditions for head swing when the cow gets up and lies down.

The top polymer tube guides the cow as it enters and exits the cubicle. It ensures that the cow lies down as straight as possible and that it does not turn around in the cubicle.

The lower polymer tube follows the cow's body as it lies down and ensures optimal lying conditions. The thickness and composition of the tube ensures that if the cow tries to lie crooked, it is gently but firmly guided into place.

The open end allows the cow to leave the cubicle more quickly and easily than with normal cubicles. Neck rail solution: the flexible neck bar, which is mounted with a fixed bracket on the top tube, allows you to use the cow's own nervous system to ensure optimal lying comfort.

### FLEXIBILITY AND EASY ASSEMBLY

Cow-Welfare is easy to mount, and the flexible system is easy to adjust. The system's unique design makes it equally suitable for calves and cows of large and small breeds. If after some time you wish to change the cow's position, both the polymer tubes and the neck rail can be adjusted to suit the cow's needs, benefiting both the farmer and the cow.

When using Flex Stall, there are no pressure marks or injuries

# COW-WELFARE FLEX STALL ADVANTAGES

COW-WELFARE FLEX STALL'S UNIQUE DESIGN IS CHARACTERIZED BY THE FOLLOWING ADVANTAGES, WHICH WILL BE BENEFICIAL FOR BOTH THE COW AND THE FARMER

- ✓ Flexible cubicles - no pressure and damage
- ✓ Healthier cows
- ✓ Improved lying time
- ✓ Cow lies correctly
- ✓ Flexibility reduces cow injuries
- ✓ Significant increase in longevity and performance
- ✓ Better oestrus conditions - (healthy cows = better oestrus)
- ✓ Lower bedding costs
- ✓ Reduced stall cleaning time
- ✓ Improved udder health (cleaner udders = better udder health)
- ✓ Suitable for all breeds and sizes
- ✓ Easy and inexpensive installation
- ✓ Lower cost per cow per year

# COW-WELFARE FLEX FEED FLEXIBLE FEEDING SYSTEM

DESIGNED TO PROMOTE COW PERFORMANCE AND LONGEVITY  
AND OPTIMISE ANIMAL WELFARE

## FACTS ABOUT COW-WELFARE FLEX FEED

Cow-Welfare Flex Feed is a revolutionary way to feed cows. The patented flexibility follows the cow on the feeding table, where she gets no pressure, and at the same time there is nothing to prevent her from lifting her head naturally.

The system gives the cow back her freedom. The cow takes in feed faster when she feels the same freedom as on pasture. Notice how high the cow lifts her head to swallow.

The cow can reach further out on the feeding table, as the flexible apron follows the cow's movement. The cow feels no pressure or stress from other cows in the herd and therefore feels more freedom to eat normally.

The flexibility minimises injuries and wounds

# COW-WELFARE FLEX FEED ADVANTAGES

COW-WELFARE FLEX FEED'S UNIQUE DESIGN IS CHARACTERISED BY THE FOLLOWING ADVANTAGES, WHICH WILL BE BENEFICIAL FOR BOTH THE HERD AND THE FARMER

- ✓ Promotes appetite
- ✓ Cow eats the same amount of feed in less time
- ✓ The cow can reach further on the feeding table
- ✓ Natural eating conditions
- ✓ Separate feeding areas
- ✓ No "boss cows" due to individual feeding areas and natural feeding conditions
- ✓ Adjustable width
- ✓ Animal welfare = healthier cows
- ✓ No bruising or damage from the equipment
- ✓ Higher profitability

# COW-WELFARE COWSY BREEZE TUBE VENTILATION SYSTEM

DESIGNED TO PROMOTE COW PERFORMANCE AND LONGEVITY  
AND OPTIMISE ANIMAL WELFARE

## WHAT IS COW-WELFARE COWSY BREEZE?

Cow-Welfare's Cowsy Breeze is a simple but effective tube ventilation system that ensures a constant exchange of air in the barn and an effective breeze over the cows. The system can be adapted to most barns.

## FRESH AIR = LESS STRESS AND IMPROVED PRODUCTION

High temperatures combined with high humidity are major challenges in many cattle barns.

Poor air quality can affect the cows' health. Signs of heat stress in cows can be seen from 20 degrees. This can lead to a sharply reduction in milk production.

By installing Cowsy Breeze you can easily avoid heat stress and give your cows the best conditions to produce milk.

Fresh air is always supplied from outside, providing a continuous airflow throughout the barn. The tube itself is designed to suit your barn and your specific needs, so we create the best possible airflow in your barn.

Flies also cause stress and a significant loss of production in dairy farmers, whereas stalls with Cowsy Breeze have fewer or no flies. Thanks to the fresh breeze from Cowsy Breeze, the number of flies is drastically reduced

# COW-WELFARE COWSY BREEZE ADVANTAGES

COW-WELFARE COWSY BREEZE'S UNIQUE DESIGN IS CHARACTERIZED BY THE FOLLOWING ADVANTAGES, WHICH WILL BE BENEFICIAL FOR BOTH THE HERD AND THE FARMER

- ✓ Customed design
- ✓ Constant supply of fresh air
- ✓ Equal amount of air through each hole
- ✓ No heat stress
- ✓ Longer lying time
- ✓ Reduced electricity bill consumption

# COW-WELFARE LATEX SOFT MATTRESSES

DESIGNED TO PROMOTE COW PERFORMANCE AND LONGEVITY AND OPTIMISE ANIMAL WELFARE

## WHAT MAKES COW-WELFARE LATEX SOFT UNIQUE?

To develop the mattresses, we measured the size and weight of the cow and how the cow's weight is distributed when it lies down. This has enabled us to develop a mattress that fits the cow as comfortably as possible.

Cow-Welfare offers mattresses that retain their height and fit for the cow, even if the cow always kneels first and stands in the same place for many years.

## A PRODUCT WITHOUT COMPROMISE

Cow-Welfare Latex Soft is available in two versions, a slope and a straight one. The sloping version has a built-in 3.6% drop and fits virtually all stall systems. The two comfort zones of the mattress ensure optimal lying comfort and the soft top cover with two layers of nylon ensures a long life.

# COW-WELFARE LATEX SOFT ADVANTAGES

COW-WELFARE LATEX SOFT'S UNIQUE DESIGN IS CHARACTERIZED BY THE FOLLOWING ADVANTAGES, WHICH WILL BE BENEFICIAL FOR BOTH THE HERD AND THE FARMER

- ✓ The two zones of the mattress increase comfort
- ✓ Two layers of nylon in the top cover ensure long-lasting quality
- ✓ The mattress can be mounted on a flat concrete surface, minimising construction costs
- ✓ Clean and dry bed
- ✓ Reduced cleaning time
- ✓ Reduced bedding costs
- ✓ Improves hoof health

# TESTIMONIALS

## FLEX STALL

"The cows are less stressed, and this is something that can be seen on the bottom line."  
- Denmark

"Our cows are very comfortable: it's much easier for them to lie down and get up. We are very happy with Cow-Welfare's Flex Stall in our barns; more milk and less injuries."  
- USA

## FLEX FEED

"When the cows stand and eat, they don't get any pressure marks and it's very obvious to see."  
- Denmark

"It's the best investment I've made! I would recommend the stall to anyone who wants to improve animal welfare in their barn."  
- Canada

# TESTIMONIALS

## COWSY BREEZE

"Cowsy Breeze works much better than having to buy a lot of fans or use sprinklers. We have also noticed that the number of flies has decreased because of the cleaner air, and it makes the cows happier, even on hot days they still produce the same amount of milk as the rest of the year. We currently have four ventilation tubes, and we will definitely install another one if we expand the building."

- Spain

## LATEX SOFT CHY

"If we were to build again, there is no doubt that we would choose floating concrete and Cow-Welfare Latex Soft CHY from the start - it saves both time and money!"

- Germany

# FAST RETURN OF INVESTMENT WITH COW-WELFARE PRODUCTS

## FACT: HEALTHY COWS IS A PROFITABLE BUSINESS

When should your cows have better conditions that improve your bottom line?

### AVERAGE IMPROVEMENTS FOR COW-WELFARE STALL INVENTORY:

- 2.5-4 litres more milk per cow per day
- Cull rate decreases by 4-5%
- Lying time increased by 1.5 hours per day
- No neck, shoulder, and knee injuries
- Less stress due to optimal conditions
- Better oestrus conditions as the cows are in a better state of health
- Cleaner and healthier cows

## WE CARE

### YOUR FUTURE IS OUR BUSINESS

We care about the farmer's economy and income. We care about animal welfare, healthier cows, longer livestock life and barns that ensure a higher production. We care about making work and life easier for the people working in the barns.

### ABOUT COW-WELFARE

Cow-Welfare develops and produces innovative barn equipment for dairy cows. In recent years, Cow-Welfare has gained great recognition and market share in most of the world, because welfare pays.

Cow-Welfare is constantly evolving and developing new ideas, so there will always be something to look forward to in the future.

## WORLDWIDE

### INTERNATIONAL SALES NETWORK

Cow-Welfare sells animal welfare products through a dealer and distributor network that is properly educated and trained to give you and your herd the best recommendation for the future.

You can find a dealer in your area at:
